

AI-Powered Customer Support & Service Automation Using Salesforce

Project Demo Planning

Project Name	AI-Powered Customer Support & Service Automation Using Salesforce
Maximum Marks	1 Mark

Project Demo Planning

A well-structured demo plan ensures that the project is presented in a clear, organized, and professional manner. This demonstration is designed to showcase the complete workflow of the AI-Powered Customer Support & Service Automation Using Salesforce application. The demo begins with an introduction to the business problem and project objectives, followed by a walkthrough of the Salesforce Lightning application. It then demonstrates the implementation of custom objects, automation using Validation Rules and Record-Triggered Flows, AI-powered features using Prompt Builder and Agentforce, and concludes with reports, dashboards, and future enhancements.

Demo Plan

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Project Introduction	Introduce the project, explain the business problem, objectives, and the benefits of AI-powered customer support automation.	2	Mercy Pranathi Gopi
2	Salesforce Application Overview	Demonstrate the Salesforce Lightning Application, navigation menu, custom objects, tabs, page layouts, and overall system architecture.	2	Mercy Pranathi Gopi
3	Customer, Merchandise & Orders Management	Demonstrate Customer, Merchandise, and Orders objects by creating records, managing relationships, and showing automated order calculations.	4	Mercy Pranathi Gopi
4	User Case Automation	Demonstrate User Case management, Validation Rules, Record-Triggered Flows, AI Summary generation, and automated case processing.	4	Mercy Pranathi Gopi

S.No	Demo Section	Description	Duration (mins)	Responsible Member
5	AI Features & Analytics	Demonstrate Prompt Builder, Agentforce, Reports, Dashboards, Queue Management, and AI-assisted customer support capabilities.	2	Mercy Pranathi Gopi
6	Conclusion & Future Scope	Summarize the project achievements, discuss scalability, future enhancements, and answer evaluator questions.	1	Mercy Pranathi Gopi

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Briefly explain the business challenges in customer support and the objectives of the Salesforce solution.
2	Solution Overview	Present the Salesforce architecture, custom objects, automation, and AI-powered components used in the project.
3	Live Feature Demonstration	Demonstrate Customer, Merchandise, Orders, User Case, Validation Rules, Record-Triggered Flows, Prompt Builder, Agentforce, Reports, Dashboards, and Queue Management with live examples.
4	Q&A Session	Address evaluator questions, explain technical implementation, AI integration, business benefits, and future enhancement possibilities.
