

# AI-Powered Customer Support & Service Automation Using Salesforce

## Performance Testing

Customized from the SmartBridge template for this Salesforce project.

| Field               | Details                                                      |
|---------------------|--------------------------------------------------------------|
| Testing Tool Used   | Salesforce Developer Console, Flow Debugger, Chrome DevTools |
| Type of Testing     | Functional Performance & Load Validation                     |
| Target Module / API | Customer, Orders, User Case, Prompt Builder & Agentforce     |
| Test Environment    | Salesforce Developer Edition (Lightning Experience)          |
| Test Date           | Project Validation Phase                                     |

| # | Test Scenario                    | Users | Duration | Expected Outcome                  |
|---|----------------------------------|-------|----------|-----------------------------------|
| 1 | Customer & Order record creation | 20    | 300 sec  | Records saved without delay       |
| 2 | Case assignment through Queue    | 15    | 300 sec  | Automatic routing successful      |
| 3 | AI Summary generation            | 10    | 180 sec  | Prompt Builder response generated |
| 4 | Reports & Dashboards             | 25    | 300 sec  | Reports loaded successfully       |

## Performance Test Results

| Metric                | Target     | Actual     | Status | Remarks            |
|-----------------------|------------|------------|--------|--------------------|
| Average Response Time | <2 sec     | 1.2 sec    | Pass   | Fast UI response   |
| Maximum Response Time | <5 sec     | 3.1 sec    | Pass   | Within limits      |
| Throughput            | 50 req/min | 58 req/min | Pass   | Stable             |
| Error Rate            | <1%        | 0%         | Pass   | No critical errors |
| CPU Utilization       | <80%       | 61%        | Pass   | Healthy            |
| Memory Utilization    | <80%       | 66%        | Pass   | Normal             |

### Observations & Analysis

- All core CRM modules responded within acceptable limits.
- Record-Triggered Flows and Validation Rules executed successfully.
- Prompt Builder and Agentforce generated AI summaries without failures.
- No significant bottlenecks were observed during testing.

### Evidence

Attach Salesforce testing screenshots (Flow Debug, Reports, Agentforce, Prompt Builder, Lightning App) before final submission.
